## Self Contained PC Programmable Key Expander

## Overview

The QD-7008 by Fourten Engineering is a keypad expansion unit for the Kenwood Viking VM-5000, 6000 and 7000 series mobile radio as well as the Kenwood NX-5000 series mobile radios. Designed for public safety use, the QD-7008 is a easy to use quick access keypad expansion unit that allows a user to switch to any deck/zone/channel in the mobile radio with the press of one button. The QD-7008 can be programmed for single key channel access or single key access to other mobile radio functions, such as Scan, PA or Accessory Control.

### Backlit Button and Selected Option Indicator

The QD-7008 has easy to use 1/4" x 1/2" buttons that are backlit and allow for insertion of stock text legends or custom text legends.

### PC Programmable and Field Upgradable

No matter how often your needs change, the QD-7008 is PC programmable for easy updating to your radio specific needs and is easily updated with new button settings and firmware with a standard USB connection.
